EDUCATION

- Carnegie Mellon University (CMU)** 05/2019
- Master of Science in Mechanical Engineering
 - GPA: 3.89/4.0
- Shanghai Jiao Tong University (SJTU)** 06/2016
- Mechanical Engineering (Joint Program)
 - GPA: 3.83/4.3
- Harbin Institute of Technology (HIT)** 06/2017
- Bachelor of Engineering in Mechanical Design, Manufacturing and Automation
 - GPA: 3.76/4.00

RESEARCH EXPERIENCE

- Multi-Resolution A* algorithm – Search-based Planning Lab (CMU)** 06/2019 - Present
- Researched on executing multiple searches simultaneously in search-based planning to explore search spaces with different resolutions.
 - Exploited different scheduling policies such as *DTS* to speed up the search.
 - Conducted experiments in 2D, 3D and 7D planning and succdded with highly increased success rates of planners and drastically accelerated planning processes.
 - Supplemented the *SMPL* motion planning library with mesh loading functionality.
- Walker Project – Search-based Planning Lab (CMU & UBTech Inc.)** 04/2019 - Present
- Customized SLAM algorithms for Walker robot to assist its indoor navigation.
 - Mapped out the workspace of Walker robot with respect to the conveyor.
 - Implemented ARA* algorithm on Walker robot for manipulation tasks on conveyor.
 - Constructed perception-planning-grasp peipeline for grasping tasks, e.g., grasp a box from conveyor.
- Cruzr Project – Search-based Planning Lab (CMU & UBTech Inc.)** 10/2018 - 04/2019
- Customized SLAM algorithms for Cruzr robot to assist its indoor navigation.
 - Constructed a state machine to coordinate planning and SLAM.
 - Constructed local controllers to execute plans returned from planner.
- Planning Using Soft Duplicate Detection – Search-based Planning Lab (CMU)** 12/2017 - 02/2019
- Explored search-based planning approaches in continuous state space with soft duplicate detection scheme.
 - Implemented machine learning techniques in prioritizing states and map pattern recognition.
 - Wrote one visualization software with *OpenGL* library to monitor planning process.
- Quad-rotor Tajectory Optimization – the Robotics Institute (SJTU)** 05/2016 - 06/2016
- Implemented optimization techniques for quad-rotor trajectory planning with dynamic constraints.
 - Adopted differential smoothing algorithm to reduce jitter.
- Small Wheeled Jumping Robot – Lab of Advanced Actuation Technologies (HIT)** 08/2015 - 01/2016
- Designed cellular wheel structure for the robot and conducted force analysis on it.
 - Completed circuit design of single chip microcomputer based on STM32 minimum system board.
 - Implemented the PID controller to maintain jumping speed at high level.
- Nation College "Freescale Cup" Smart Car Contest** 09/2014 - 04/2015
- Applied PID controller and used Labview software to simulate and analyze the performance of the smart car.
 - Applied Kalman filter to process magnetic field signals thus localizing the smart car in real-time.

COURSE PROJECTS (CMU)

- Power plant Substation-to-feeder Path Prediction – Bayesian Machine Learning** 02/2019 - 05/2019
- Collaborated with Kevala company on predicting feeder-path endpoints and outperformed peer team at the Facebook company.
 - Implemented CNNs to predict the endpoints of power lines with accuracy 92% .
 - Employed motion planning algorithms in generating the substation-to-feeder paths.
- Offline Hand-written Chinese Characters Recognition – Pattern Recognition Theory** 09/2018 - 12/2018
- Implemented CNNs in recognizing hand-written Chinese characters with accuracy 98%.
 - Implemented decision-trees, SVM as baselines against CNNs in recognizing hand-written Chinese characters.
- Inserting A Curve Into Mesh – Advanced Engineering Computation** 03/2018 - 05/2018
- Succeeded in leveraging the *OpenGL* Library to load and render 2D mesh with the *C++* language.
 - Reproduced the work of one research paper about inserting a curve into one mesh figure and increased the smoothness on the edges between different components of this figure.
- Aviation Game – Engineering Computation** 09/2017 - 12/2017
- Designed a GUI for an aviation simulator which gained popularity among the class.
 - Achieved the basic functionality of an aviation game including control model of an airplane based on kinematics and dynamics.

ACTIVITIES

- The IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS), Macau** 11/2019
- Co-Chaired the *Motion and Path Planning III* session.
 - Presented my research *Escaping Local Minima in Search-Based Planning using Soft Duplicate Detection*.
- Visitor, HIT Robot Group Inc.** 07/2015
- Technical communications on combination of production and academia research about industrial robots.
- Volunteer, HIT Library** 02/2014 - 07/2014
- Provided consultation services to students.
 - Worked with librarians on book organization system.
- Leadership, Charitable Association to Transmit Childhood** 09/2013 - 01/2014
- Planned and participated in public service activities for children with autism.
 - In charge of designing activities and games that benefits the mental health of autistic children.

HONORS & AWARDS

- People's Scholarship in China for **three consecutive years** 12/2013 - 12/2015
- SMC Scholarship 09/2015
- 2nd Prize in Nation College *Freescale Cup* Smart Car Contest 04/2015
- Shanghai Huiyi Scholarship 09/2014
- 2nd Prize in annual project at HIT 09/2014
